HOW COULD WE KEEP TRACK AND GENERATE REPORTS ABOUT THE STATE AND THE USAGE OF OUR DISTRIBUTED COMPUTERS ?

At first, we need to determinate few factors :

What is the state of the computers when they are send?

Who are the final users?

How frequently the computers are used?

Being able to see if the users take care of the computers

APP THE GAP

TRY ME NOW

WHY USING IT ?

Giving an IDentity to our computers

When it needs to be repaired, replaced or recycled

Giving partners a full transparency

Will allow us to get detailed reports

Badges to reward users for the maintenance and reporting
